1912 WINS FROM NEWTON H. S. 11--0

Sophomores Outclass Newtons And Win Hard-Fought Game

Completely outclassing the Newton High School eleven, the sophomore football team yesterday afternoon defeated them by a score of 11-0.

The game was called at 3:15 on Claflin field. From the very start it was evident that the superior weight of the sophomore team would give them the victory. The first half was stubbornly contested, but towards the last, with one minute to play, Newton punted on their own 40 yard line. Robinson, left end for the sophomores, blocked the kick, and taking it on the bound he ran the field for a touchdown. The goal was not kicked and the half ended.

Score, 1912—5, Newton H. S.—0.

Eicher took Roberts place at quarter in the second half. The ball was rushed down towards the middle of the field, when on the third down the team was forced to punt. Newton then, by the excellent playing on the part of Captain Gallagher, and aided by a 15 yard penalty, finally placed the ball on the sophomore 2 yard line. Here they were held for three downs by the excellent defensive work on the part of the sophomore eleven. The sophomores by old fashioned football then pushed the ball the length of the field. Twenty yards from the Newton goal Beale had his knee badly wrenched. Barns went in his place and these plays later took the ball over the line for a touchdown. Eicher kicked the goal.

Score, 1912—11. Newton—0.

The half ended with the ball in the middle of the field.

The sophomore lineup follows:—

Torrey, re.; Barnes, rt.; Kebbon, rg.; Swenson, c.; Whittlesey, lg.; Kimball, lt.; Robinson, le.; Robinson and Eicher, qb.; Raymond, rhb.; Woodward, lhb.; Beale and Barnes, fb.

TRACK TEAM

H. S. Benson Elected Assistant Manager By T. A. A.

At a meeting of the Technology Athletic Association yesterday, Harvey Smith Benson 1912, was elected assistant manager of the track team. Benson was Athletic Association Representative his first year and manager of the 1912 relay team. He is a member of the two mile relay team and hare and hounds.

P. H. Pearson 1911, has been empowered by the Athletic Association to issue a call for candidates for assistant track manager.

Before the conference of the State Board of Charities, Mrs. Ellen H. Richards delivered an article analyzing the domestic situation of the present time and pointing to the school as the true source of reform. The development of industries and agriculture, with their accompanying experiment work, has not been simulated in domestic science to a sufficient extent. Through practical teaching in the schools, the home will be made to feel the importance of the habits so necessary for safe living and the enjoyment of daily life.

FRIDAY EVENING ENTERTAINMENT IN THE UNION AT 8.00 P. M.

SPEAKER, F. P. FISH

President of American Telephone and Telegraph Co., Member of Institute Corporation, Member of Educational Commission, Presided at Inauguration of President Maclaurin

COME AND HELP FILL THE UNION

CAPT. A. T. EASTON REPORTS FOR DUTY

Relieves Major Wheeler As Head Of Military Science Department

Captain Alpha T. Easton, who arrived Saturday here for duty as instructor in Military Science took charge of that department of instruction Tuesday. Captain Easton has seen a good deal of hard service in the army. He started out as captain in the 28th U. S. volunteers in 1898. In 1901 he received a civil appointment as First Lieutenant in the 29th U. S. infantry. Captain Easton served three terms in the Philippines with his regiment and retired from the army June 12, 1909.

The policy of the Military Science Department will not be changed and, with the exception of the one hour drill periods twice a week for each section in place of the one two hour period formerly given, Major Wheeler's plans for the course will be continued.

FIELD DAY SHOW

Arrangements For Seats Have Been Entirely Completed

Tickets for Tech Night, Friday, Nov. 5, are now on sale among the committees of the different classes. L. C. Hart is the chairman of the freshmen committee. The choice that this Theater Committee has made is Elsie Janis in the "Fair Co-Ed." which will be at the Colonial. This choice has pleased everybody and a big Tech Night is promised. Special preparations are being made in the cast and there will be "hits" in plenty.

The freshmen are showing considerable interest in the event and are making elaborate plans. Every freshmen should make it a point to be with and support his class that night.

Seats must be bought early. First come, first served. The sophomores have first choice in the house and will sit in a body in the orchestra.

The prices of tickets are very reasonable. Entire orchestra with the exception of the last two rows, $2.00. First balcony, 1st four rows $1.50, second four $1.00, and last five 75c. All the boxes will be taken by 1912 and 1913 teams. Exchanged tickets should be bought at once to secure best positions.

TECH SHOW KOMMERS NOVEMBER TWENTIETH

Author Of Show Book For 1910 Will Be Announced At Dinner

November twentieth has been decided upon as the date for the annual Tech Show Kommers, by far the largest dinner of the year given at the Union. The idea of giving a Kommers dinner to all the under graduate body, and especially

to the freshmen, originated four years ago and has steadily increased in popularity ever since. All who attended last year will need no especial urging to be present again. It is primarily the freshmen who should make an effort to be present at this dinner given under the auspices of the largest student activity at the Institute. He will be able to find out just what the show is, the objects and provinces of all the different departments, and will also spend a most enjoyable evening. For the old Show men there is the pleasure of meeting each other again for the first time this year as Show members, and of hearing some of the songs from previous Shows. Mr. James Francis, a great favorite with the men for several years, is just at present in Pittsfield,

(Continued on page 2.)

MINING ENG. SOCIETY MEETING AT UNION

Talk By Mr. Geo. Packard '90 Many New Men Proposed For Membership

The meeting of the Mining Engineering Society was called to order at the Union at eight o'clock last evening by the president of the society. The minutes of the last meeting were read and approved. The followeing names were proposed for membership:

A. Armstrong, D. F. Baker, W. F. Barnes, W. H. Baxter, J. M. Beate, R. Benundez, J. D. Bray, R. S. Cox, C. M. d'Autrmont, D. J. Jenkins, R. R. Langer, J. B. Little. H. D. MacDonald, H. B. Davis, G. H. Duell, L. B. Duke, C. Fallon, H. R. L. Fox, A. F. Gibson, L. H. Goodwin, A. P. Hammond, M. T. Hsu, A. H. Means, S. E. Reed, H. H. Sharp, F. E. Starr. R. C. Stickney, P. M. Tyler, O. K. Wiessner, R. E. Whipple, C. R. Woodward, T. T. Sun, H. O. Maxwell, S. C. Neff, J. H. Morley, E. G. Brown.

The president made a few remarks, urging the men to pay up the dues and initiation fees. The meetings cannot be run on credit only. The success of the society in the present year depends upon its financial condition. Meetings of the society will probably be held every three weeks at the Union.

The speaker of the evening was Mr. Geo. Packard 1890. Mr. Packard has had many interesting experiences in the mining work since leaving the Institute, among these, a trip through the West last winter. He gave a "non-technical" talk about the various mining localities that he visited during this western trip, pointing out to the members of the society many problems that they undoubtedly will have to face in their professional work. He stated that a mining engineer should be a mineralogist to locate a metal, an assayist to determine the value of a metal, a chemist to examine a metal ore, a surveyor to lay out a mine or claim, a draftsman to draw up plans for buildings, an architect to properly construct the buildings, an hydraulic engineer to take advantage of any water power handy, and an electrical engineer to properly construct and place machinery. The mining engineer should study the National and State laws regarding control of lands, should know the elements of cooking, should be good swimmers and handlers of boats, should know how to handle horses, and above all things else, how to handle men.

CALENDAR.

Thursday, October 28.

1:00 P. M.—Rifle Club Meeting, 33 Rogers.

BOSTON, MASS., OCTOBER 28, 1909.

Some people go to the theatre to be amused, some to have their thoughts diverted and some to study a little about human nature. While most of us go to be amused, we all like a play that brings in all the sides of human interest.

Tech Show is far renowned and has a name as no other college production, it has always provided entertainment for the moment and even produced some music that last, but as far as the play is concerned but few recall without effort anything that impressed them in the plot and character work of the piece.

In order to live up to its name, the Show must not only be as good as it has been, but also make improvements. The music and dancing can hardly be made better, but we dare say the plots of the plays could be much improved. The past plays written by Tech men have been accepted and excused on the ground that they were all that could be expected of young producers, but just the same the lack of a real plot has been felt in them, something to make the work of the players be more than mere actors to amuse and entertain.

This fault is not caused by lack of talent, Technology has plenty of men who can and must produce something that will have the right admixture of amusement, and human interest and will bring the level of Tech Show up to that of any play of success.

At the meeting of the committees yesterday noon, the M. I. T. Young Men's Christian Association was able to report $30.00 pledged for the Building Fund of the Boston Association. Almost to a man the students and instructing staff are responding to the call, but as yet only two men are on the work and can not put much time on it.

Will some of the old association men offer their services at once. See Robinson, or leave a note at the Cage for him.

If you have not been called on, and want to help, get a card at the Cage, fill it out for any amount from twenty-five cents to twenty-five dollars and mark the envelope:—Y. M. C. A.

The cards have been slowly disappearing from the Cage, but the fellows took them must have mailed their contributions to the Boston Association. Leave 'em at the Cage and give the Tech Association the credit.

Watch the clock on the Union bulletin board.

Y. M. C. A.

It seems timely that something should be said about the performance of 1913 in their first track meet. With the generous handicaps given, a freshman class has more than a chance to win the meet.

There are at least two causes why 1913 has not shown more brightly in cross-country and track practice so far. Firstly, there is a large supply of "I don't care" spirit, as shown by the recents disgraceful mass meeting. Secondly, there are evidently few or no "already developed" athletes among the freshmen. Men who have never done track work will seldom decide upon track training three days a week to escape the gym work. Having elected gym work for three days a week, and being elected to drill for two, the poor fresh does not feel the call for track also. I suggest that he should be allawed to do either track work or gym work, dividing up the work as he chooses. For instance, any man running in the hare and hounds chase should be excused from one day's gym work that week. As attendance is taken at both the gym and the track, men could easily be checked up for their three days work a week.

L. O. MILLS, 1910.

TECH SHOW KOMMERS

(Continued from page 1.)

but has promised to get to the dinner if he possibly can.

The sealed envelope containing the name of the author of Tech Show 1910 will be opened at the dinner. It is also hoped that the General Manager will be able to make public at this time some of the plans for trips and number of performances to be given.

Tickets for the Field Day Show Buzz Wagon have been received, and may be gotten from H. C. Davis or H. L. Woehling upon payment of fifty cents. The wagon is almost full at present, so those who want to be sure of a seat should procure tickets at once.

EXCHANGES

Once again has Coach Charles E. Courtney at Cornell show that he is supreme in all rowing matters at the Ithaca institution. And in consequence, thereof, 65 freshmen aspirants for their class will have no chance to row at Poughkeepsie next June. It appears that when the call for candidates was issued no less than 131 freshmen, an amazingly large number, responded to the call. They were ordered, after a little talk by Coach Courtney, to report the following days on the inlet for practice. Sixty-six of the number followed instructions and were on hand each day. Sixty-five others didn't deem it of sufficient importance to present themselves on either of the first two days of actual rowing last week. Thereupon they were summarily dismissed by Courtney with the following characteristic mandate: "Strike their names off the list. We don't want them down here again and they won't have another chance with the crew."

The University of Iowa is about to build a new physics building at a cost of $215,000.

The Purdue Exponent Claims that Purdue University will have the largest university machine shops in the country, when those now building are completed.

No text books are to be used in the Economics course at Dartmouth this year. Instead the class has been asked to subscribe to the New York Post, and to read the paper thoroughly, in order to discuss economic questions in class.

Princeton has run into some hard luck in track. J. E. Sterrett, who enrolled this fall from a western college and who can pole vault 12 feet 2 inches, is ineligible because he is a member of the graduate school.

Syracuse and Colgate will hold a dual cross-country run on Nov. 13.

According to the announcement of Franklin B. Ellis, manager of the University of Pennsylvania Relay Carnival, the relay games at Philadelphia next spring will be held April 30.

The quarterback of the Wisconsin football team was suspended recently for participation in hazing. All the student body and a large part of the alumni are up in arms about it, and have passed petitions asking the faculty to reconsider its decision.

CURRENT EVENTS

Promising yacht designers on this side of the Atlantic are joining with Sir Thomas Lipton in his suggestion that a fairer and better race for the America's cup could be sailed with larger and more seaworthy boats, than with the lighter "racing machines" which have been developed under the old rules.

Ex-President Theodore Roosevelt and his hunting party are today leaving Londioni, British East Africa, for Eldama ravine.

The threatened dual between the Secretary of State at Havana, Justo Garcia Velez, and the Secretary of Sanitation, Dr. Mathias Duque, will probably not take place, the court of honor to which the affair was referred having decided that there is no necessity for an encounter. The trouble arose out of an alteration between the two ministers over what Secretary Duque believed to be the impertinent interference of Secretary Valez in his department.

Jean Comandon announced before the Academy of Sciences yesterday the discovery of a new method of photographing bacilli by the combined use of an ultramicroscope and a cinematograph. The discovery is considered of first importance, opening, as it does, a new field for the study of microbic action.
